Dreamtilt offers a range of high speed wireless broadband for residential, business and industry in Gladstone and surrounding areas. We also provide VoIP solutions, dialup internet, web hosting and design services with a dedication to local customer service. We also host a number of Wifi hotspots in Gladstone where Dreamtilt members can connect for free. We aim to offer Gladstone and the surrounding areas a choice for their Internet services.

Dreamtilt is a private company founded on 10 Oct 1999 in Gladstone, Queensland and has grown from offering dial up services to a range of Internet related products. We strive to provide Gladstone and the surrounding regions an alternative choice to the larger ISP companies by offering local service to our valued customers.

# Technology at work for you

## CONNECTING YOU TO THE TECHNOLOGY YOU NEED

Whether at home or at the office, you're making more and more demands of your Internet connection — you want delivery of high-demand technologies like Internet access, Voice over IP, video services, and security surveillance. And you want them now.

You need a company that works for you, with the same understanding that you would expect from a local business.

And being a local business means local support. Not only can you talk to us on the phone, but we can see you in person. It all leads to a lasting and engaging relationship that we strive for.

## CUSTOM SOLUTIONS

Dreamtilt can tailor solutions for any business – whatever their requirements. The flexibility of our business allows us to provide you exactly the Internet Communications package you need with the one local company to provide it.

## DREAMTILT SOLUTIONS

- WIRELESS BROADBAND
- VOIP
- VOIP PBX SYSTEMS FOR BUSINESS
- WEB HOSTING
- WEB DESIGN
- EMAIL MARKETING
- EMAIL SURVEY
- SEARCH ENGINE OPTIMISATION
- WIRELESS HOTSPOT

# flexible solutions for your needs

## WIRELESS BROADBAND

Dreamtilt Wireless provides wireless connections that can be used to transport voice, video and data. It's a total broadband access solution designed for extending networks wirelessly to provide broadband services to virtually anybody, in anywhere — even in rural and island areas.

Dreamtilt Wireless combines field-proven toughness with exceptional performance, security, ease-of-use and cost effectiveness. And with a broad array broadband plans available, it can be configured to meet your current and future needs (residential, business or industry).

## VoIP

Dreamtilt VoIP (which stands for Voice Over Internet Protocol) is a technology that allows for the delivery of voice communications over the Internet.

Why is that a big deal? Because VoIP is very inexpensive, and yet more flexible than traditional phone service. That makes it a great option for many homes and businesses.

## DREAMTILT PROVIDES A TOTAL SOLUTION FOR YOU.

## WEB DESIGN & HOSTING

The best way to go global is to stay local, so here we are, your local ISP, suggesting that the best way for your business to "go global" is to hire us to design your web site. Sure, there's some irony there, but our reasoning is sound.

First of all, we know how to design highly-effective sites. As your local ISP, we have a vested interest in the success of your business. And we'll make it easy for you. We'll come to you and work to devise the best strategy and architecture for your site.

And once we have designed it, we can host it for you as well. At Dreamtilt, we have a range of web hosting plans that deliver cost effective solutions with a range of features that you would expect from a 'premium' webhosting company. We specialise in offering small business plans to local businesses in the local area.

## WEB SOLUTIONS

Web sites aren't just for the behemoths of business anymore. Even if your business is small or medium-sized, we believe it's critically important that your company has a viable presence on the web. And furthermore, we believe we're the right people to design your site for you.

## SEO SOLUTIONS

Is your website non-existent on search providers? Then your site is not performing and is costing you money. Smart businesses are investing money into search engine optimisation (SEO) to ensure they achieve the best result from their website without having to pay for online advertising
